Composed between August and October, 2005

Hommage à Lou Harrison (1917-2003)

'Acousmatic' Premier: 27 April, 2007 (St. Neighborhood Unaitarian Church, Los Angeles Sonic Odyssey: Electronic and Computer Music Concert Series 2007, 26-28 April, 2007, Pasadena, California, USA)

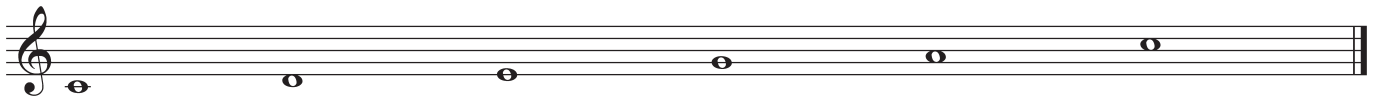
Duration: 11'50"

PROGRAMME NOTES

In order to understand the basic concept of just intonation, one must refer to the natural acoustic phenomenon known as the 'harmonic series'. The overtones of a specific pitch are generally referred to as the 'harmonic series', and the musical scale derived from this series is constructed around pure (or just) intervals. This system of just intonation is strikingly dissimilar to the 'twelve-tone equally-tempered division of the octave', which is based on the division of the octave into twelve equal intervals – the frequency ratio of each semitone (or tempered half-tone) being the twelfth root of 2. In *Lou Harrison: Composing a World* Leta E. Miller and Fredric Lieberman describes just intonation thus: "Pure intervals arise when the frequencies of the individual tones reflect the precise mathematical proportions that occur in the series: 3/2 for the fifth, 4/3 for the fourth, etc." Intervals manifested naturally within the harmonic series are particularly favourable in just intonation, and certainly ones with "superparticular vibration ratios", where the "numerator exceeds the denominator by one" such as the just perfect fifth (3/2), perfect fourth (4/3), major third (5/4) and minor third (6/5).

'La Homa Kanto' or 'The Human Song' in Esperanto is a dedication to the late American composer Lou Harrison (1917-2003), and its pitch material has been derived directly from Harrison's five-tone scales, presented in *Lou Harrison's Music Primer: Various Items About Music to 1970*. Included are the first five in the series, with the first – the diatonic or major pentatonic scale – acknowledged by Harrison as the "prime pentatonic", and "practically the Human Song." According to Harrison, "These first five are the most widespread, the core, the principal modes of 'Human Music'. They also constitute the bone-work, the firmest compositional basis for seven-tone music." Modes one, two and five may be considered to be anhemitonic pentatonic forms (scales incorporating half steps, or semitones), while three and four, hemitonic pentatonic forms (scales not incorporating half steps, or semitones). Harrison's five pentatonic scales include the diatonic or major pentatonic, minor pentatonic (or fifth mode major pentatonic), Japanese *Hirajoshi*, fifth mode Indonesian *Pélog*, as well as the Indonesian *Sléndro* (or second mode major pentatonic). The consideration of their complements presents the third mode major pentatonic, fourth mode major pentatonic, third mode Indonesian *Pélog*, fourth mode Japanese *Hirajoshi*, as well as the Indonesian *Sléndro* (or second mode major pentatonic).

Major Pentatonic Scale "The Human Song"



The compositional strategy for the work involves the creation of two complimentary sets of melodic material, consisting of what is essentially a four-bar melodic sentence based on Harrison's first pentatonic (or major pentatonic), with an additional four-bar variant based on its complement (or third mode major pentatonic). In some aspects, this second sentence could be considered an almost comparable inversion, although it does not represent an 'authentic' inversion in the serial sense of the word, but rather an inversion of contour utilizing the inverted pitch material of the original major pentatonic. The third bar of both versions represents the only literal inversion of intervals. A further observation reveals the respective major and minor tonalities of the two four-bar melodic sentences.

Four-bar melodic sentence

Complimentary sentence

The work also features ten distinct tuning modulations: three-limit, five-limit, seven-limit, eleven-limit, thirteen-limit, seventeen-limit, nineteen-limit, twenty-three-limit, twenty-nine-limit, and thirty-one-limit just intonation systems, based on the third, fifth, seventh, eleventh, thirteenth, seventeenth, nineteenth, twenty-third, twenty-ninth, and thirty-first partials of the harmonic series – each system adding its own microtonal nuances to the recurring melodic material, which is further transformed via the introduction of alternative scalar material, as well as via harmonic development pertinent to each individual just intonation system. The structural framework of the composition is directly related to the primary motive of the four-bar melodic sentence. In five-limit terms, the primary motive denotes the following intervals: 5/4, 3/2, and 9/8, and 5/4, and 3/2; and is expressed in the score as section one (rehearsal letters A and B – incorporating Lou Harrison Pentatonic #1, and both three-limit and five-limit just intonation), which is designated a 5/4 metrical structure; section 2 (rehearsal letters C and D – incorporating Lou Harrison Pentatonic #2, and both seven-limit and eleven-limit just intonation), a 3/2 metrical structure; section 3 (rehearsal letters E and F – incorporating Lou Harrison Pentatonic #3, and both thirteen-limit and seventeen-limit just intonation), a 9/8 metrical structure; section 4 (rehearsal letters G and H – incorporating Lou Harrison Pentatonic #4, and both nineteen-limit and twenty-three-limit just intonation), a 5/4 metrical structure; and section 5 (rehearsal letters I and J – incorporating Lou Harrison Pentatonic #5, and both twenty-nine-limit and thirty-one-limit just intonation), a 12/8 metrical structure (equal to 3/2). A sequential series of metrical structures is therefore utilized in the work to reflect the primary motive and its frequency ratios of 5/4, 3/2, 9/8, 5/4, and 3/2.

Saturday, 3 February, 2001 (Our Colleague Lou Harrison)

Dear Fellow SCI Members:

“I just received very sad news from my colleague and fellow SCI member Donald Harris. He reports that Lou Harrison, noted American composer, passed away last night.

“Lou Harrison had appeared at several of our National Conferences. His cheerful, luminous personality endeared him to and will be remembered by all who knew him. Lou was en route to Ohio State for our annual New Music Festival which honours him and features his music.

“I include the message I received from Don Harris, who related the sad news to our faculty.”

Thomas Wells (President, Society of Composers, Inc.), Professor of Music, Director, Sound Synthesis Studios, Ohio State University, Columbus, Ohio, USA

Saturday, 3 February, 2001 (Our Colleague Lou Harrison)

"Last night, while travelling from Chicago to Columbus, Lou Harrison passed away. We had sent Adam Schweigert and Joe Panzner, two students in Composition and Theory, to Chicago with a University van to greet Lou and his travelling companion, Todd Burlingame, and drive them back to campus for the Festival. Lou does not like to fly and took the train, the California Zephyr, from near San Francisco to Chicago. The train arrived at about 5:15 PM. While en route to Indianapolis, their overnight destination, Adam, Joe, Lou and Todd decided to stop at a Denny's restaurant in Lafayette, Indiana, for some dinner. Lou stumbled and fell upon getting out of the vehicle and apparently suffered a heart attack. He had great difficulty breathing. Paramedics were called and they arrived within minutes. Lou was transported to the hospital but was unable to be revived. He passed away around 9 or 9:30 PM.

"This is a great tragedy for the entire world of music. Lou was as excited about the Festival as we were. Our sympathies go out to all in the world of music and dance who treasured his great gift. I will always remember the joy in his voice when we spoke over the telephone about the Festival. He was an active participant in planning the concerts. He had also prepared a special seminar for OSU students in composition. He was very much looking forward to the CSO performances of his Third Symphony in a final revision that he had just completed. He told me how honoured he felt to have so many of his compositions performed on the Festival. Let everyone know that the Festival performances will go on as planned as a tribute to this legendary American musician.

"I must also at this time offer our sincere thanks to Adam and Joe. As you might imagine, they were devastated by what took place. Yet they remained calm at all times, stayed in close touch with me, and were of great comfort to Todd Burlingame. We can be proud of the way they represented Ohio State and the School of Music. Adam and Joe will return to Columbus today. When you see them, please thank them for their calm and measured reactions under such tragic circumstances.

"Lou Harrison will be cremated today; his remains shipped back to California. He was eighty-five years old."

Donald Harris, Professor of Composition and Theory, School of Music, Ohio State University, Columbus, Ohio, USA

Thursday, 6 February, 2003 (Death of Lou Harrison)

Dear Thomas Wells,

“Thank you very much for sharing the sad information about Lou Harrison. And what a beautiful tribute by long-time SCI member, Donald Harris. Lou attended symposia in his honour many times here in Portland, Oregon, Lou's place of birth. Two recent ones in particular stand out when Lou was aged 79 and 82. The first was at Lewis & Clark College in Portland with Bill Colvig, his late partner. Lou gave numerous inspiring lecture presentations that took your breath away, and when his music was performed by L&C students to a large public audience, Lou signed CD's late into the night despite his need to get up early the next morning to present again and again for several days. His music was, and continues to be, performed often in Portland on many of the instruments Lou invented with Bill Colvig.

“Do you remember how Lou would title many of his musical compositions in Esperanto?! Lou was passionate about keeping this rarely used universal language alive. Lou also designed numerous letter fonts, many of which we now select on the internet when writing our documents. Remember his beautiful calligraphic handwriting and the painstaking care with which he wrote each letter?

“At aged 82, Lou again came to Oregon and was honoured in a Symposium at the University of Oregon in Eugene where he taught a roomful of young composers for several days. Lou was a lively and brilliant presenter at these events. His eyes and whole body lit up when he spoke, and his ideas were often more controversial than those of students 60 years younger! Despite his exceptional brilliance, he never boasted of his intelligence or of anything else, instead inspiring the listener to invent and create as he did, living life to the fullest. Even into his 80's, the cogency of his ideas, his wit, passion, and joy of learning were as strong as that of a young person. Your choice of the word ‘luminous’ to describe Lou is perfect. He was a wonderful, brilliant human being, and we will all miss him greatly. I can only imagine what your New Music Festival is like with the aura of Lou Harrison hovering in the room. The music must be exceptional and every word spoken charged with power. I'm sure Lou is there with you and I wish I could be there too.

“Warm remembrances, and thank you for writing.”

Linda Hathaway Bunza, Director, Columbia Research Institute for the Arts and Humanities, Portland, Oregon, USA.

Lou Harrison, Beloved Icon and Pioneer

By Fredric Lieberman

The musical world was stunned by the death, on Sunday, February 2, of Lou Harrison, the distinguished and much beloved composer and humanitarian. In his delightful *Music Primer* (1971) Lou wrote, 'Someone has said that music is to be recommended because the Angels practice it.' Self-proclaimed a 'glandular optimist,' certainly Lou is now cherishing the songs of that Angelic choir, and I imagine he's already started teaching them to sing in Just Intonation.

Harrison, who celebrated his 85th birthday this year, was on his way to a week-long festival of his music in Columbus, Ohio, when an accidental fall apparently brought on a heart attack. The performances will go on as a memorial tribute. Lou had recently completed revisions to his *Third Symphony* – he continually revised works until they 'stopped itching' – and was enthusiastically looking forward to the premiere of the new version next Friday. (The *Third Symphony* was first performed in 1982, though its diverse movements include material from as early as 1937.)

Lou met his life-partner, William Colvig, in 1967; they lived and worked together until Bill's death in 2000. Lou's younger brother Bill also predeceased him. He is survived by his sister-in-law Dorothy, of Reno, Nevada, and two nephews Brad and Barry.

Though beset by bouts of illness, sometimes quite painful, Lou never stopped working, teaching, and learning. He recently completed a new book *Poems and Pieces*, currently in press, which juxtaposes poetry with a selection of works for the Javanese gamelan. In addition to revising the *Third Symphony*, Lou completed revisions and additions to his second opera *Young Caesar*; completed the construction of an ecologically-friendly straw-bale house of his own design in Joshua Tree, California; bought a used Mercedes diesel auto, which he had converted to run on bio-diesel fuel (that is, any form of vegetable oil); and was preparing once again to teach his course on Javanese gamelan for Cabrillo College in Santa Cruz.

As pianist Sarah Cahill pointed out, 'Lou's passing is so symbolic of the end of an era. His deep connections to Schoenberg, Ives, Cowell, and Cage made him a real icon, even beyond his own compositional career.' Born in Portland, Oregon, in 1917, Lou grew up in the San Francisco Bay area, studied music at San Francisco State College, composition with Henry Cowell and Arnold Schoenberg, and pioneered with John Cage in creating and performing works for percussion ensemble. Moving to New York in 1943, Harrison worked as a music critic for the Herald Tribune, hired by Virgil Thomson, and wrote also for *Modern Music* and *New Music Quarterly*.

Lou had previously corresponded with Charles Ives, and during this New York period conducted the premiere of Ives's *Third Symphony*, which won the Pulitzer Prize. Ives wrote to Lou 'As you are very much to blame for getting me into that Pulitzer Prize street, and for having a bushel of letters to answer and for having a check of $500 thrown over by the Trustees of Colum-Uni-, you have got to help me by taking 1/2 of this (somewhere enclosed)…'

Fusing Asian with Western music

Lou returned to California in 1953, where he settled in Aptos, near Santa Cruz. Life in California, though difficult for a struggling composer, brought him into close contact with Asian musics, which inspired melodic and modal experiments, leading to a panoply of works fusing Asian with Western music in unique and beautiful ways. Some of these works are composed directly for traditional Asian instruments, such as the many compositions for Javanese gamelan; others combine Asian and Western instruments, one of the most successful being *Pacifika Rondo* (1963); and still others, such as the magnificent *Piano Concerto* (1985) borrow musical forms or styles from Asian sources, so thoroughly integrated into the musical texture that their diverse origins are buried beneath the surface of Lou's melodic magic. Harrison's major works include four symphonies, two operas, the *Piano Concerto*, major dance scores including *Solstice* (for Jean Erdman) and *Rhymes With Silver* (for Mark Morris), the *Strict Songs* which, when recorded by the Louisville Symphony, introduced many listeners to pure intonation, and many chamber works of great power and beauty, such as the *Suite for Piano*, the *Grand Duo* for vn and pf, the *Varied Trio* for vn, pf, and percussion, and the *String Quartet Set*. These works will, I'm sure, stand the test of time.

Harrison pioneered in many fields: music for percussion orchestra; the use of pure or Just Intonation rather than equal temperament; the creation of new instruments; the introduction of gamelan music and new composition for that ensemble; and teaching world music, which he did for decades at Mills College, San Jose State, and Cabrillo College.

Lou was a founding spirit of the Cabrillo Music Festival, which has grown to be one of the most important venues for new music. In 2001, under the baton of Marin Alsop, the Cabrillo Festival performed Lou's first opera, *Rapunzel* that had been premiered at the 92nd St. Y in New York City in 1959; over the years other conductors including Gerhard Samuel, Carlos Chavez, and Dennis Russell Davies have led the Cabrillo Festival orchestra in presenting Harrison's music, along with that of hundreds of other contemporary composers.

A fearless pacifist, outspoken environmentalist

On social issues Lou was fearless and outspoken. A pacifist, he protested both in words and music against atomic testing, the Vietnam War, and militarism in general. He was an early supporter of environmental causes, championing the use of renewable fuels, paper recycled, or even better made from fast-growing, easily renewable hemp or kenaf. An advocate for Gay Rights, Lou never hesitated to make his views public. In 1963, at the University of Hawaii, Lou fired off a letter to the student paper, protesting one previously published: 'In the present population explosion, calling homosexuals sick strikes this reader as a case of pots and kettles.'

Mr. Ricardo Trimillos, then a graduate student, recalls: 'Lou was not only a wonderful artist; he was a passionate and committed citizen. I remember his letter defending gay rights back in '63 when being gay was hardly on anyone's radar screen. He signed it as 'Composer in Residence' for the contemporary festival, which upset some faculty members. However, for me he brought home the 'ideology' of understanding music in its cultural context in a very dramatic way. For me that was an important lesson, not taught, but learned.'

Harrison left a voluminous musical legacy of over 300 compositions. Over the past decade, his work has been rapidly growing in international acclaim. New CDs appear regularly; festivals and performances have been increasingly abundant. As of this writing, a memorial tribute in Santa Cruz is being organized, and others will follow.

Contagious enthusiasm, generosity, and love

For me, Lou inspired not only through his music, with its continuous search for beauty heedless of current styles or fads, but also through his contagious enthusiasm, generosity, and love. Seldom would I come away from a visit to Lou's Aptos home without the exciting feeling of having learned something remarkable, whether about music, architecture, politics, or literature. Lou filled his place in the world fully and energetically – it's hard to imagine what the world will feel like without him.

(Fredric Lieberman, composer and ethnomusicologist, teaches at the University of California, Santa Cruz. With co-author Leta Miller, he has written *Lou Harrison: Composing a World* (1998) and a second book on Lou Harrison is forthcoming from the U. of Illinois.)

PERFORMANCE NOTES

In this score, accidentals apply only to the subsequent note in sections utilizing proportional notation, whereby in sections utilizing standard metric notation, accidentals apply throughout the bar.

 fermata (approximately 2”)

// long comma (approximately 1”)

, short comma (approximately 0.5”)

The notation utilized in the score is based on Benjamin Johnston’s ‘Extended Just Intonation’. It contains 23 unique symbols, which may be combined in any manner – 5 identical to conventional sharp (♯), flat (♭), double sharp (𝄪), double flat (𝄫), and natural (♮) accidentals (raising, lowering or neutralizing a tone by 25/24 and 625/576, or 70.672 and 141.345 cents). Additional symbols include (+) and (−), raising or lowering a tone by 81/80 (one syntonic comma), or 21.506 cents, as well as the following utonal and otonal sets of symbols for each partial chroma up to the thirty-first harmonic: (7) and (𝍪), lowering or raising a tone by 36/35 (one septimal comma), or 48.770 cents; (↑) and (↓), raising or lowering a tone by 33/32 (one undecimal comma), or 53.273 cents; (13) and (𝍩), raising or lowering a tone by 65/64 (one tridecimal comma), or 26.841 cents; (17) and (𝍫), raising or lowering a tone by 51/50 (one septendecimal comma), or 34.283 cents; (19) and (𝍬), lowering or raising a tone by 96/95 (one nonadecimal comma), or 18.128 cents; (23) and (𝍭), raising or lowering a tone by 46/45 (one trivigesimal comma), or 38.051 cents; (29) and (𝍮), raising or lowering a tone by 145/144 (one nonavigesimal comma), or 11.981 cents; and finally, (31) and (𝍯), raising or lowering a tone by 31/30 (one untrigesimal comma), or 56.767 cents.

 raised by 25/24, or one small just chromatic semitone (70.672 cents)

 lowered by 25/24, or one small just chromatic semitone (70.672 cents)

raised by 25/24 plus 25/24, or 625/576 (141.345 cents)

lowered by 25/24 minus 25/24, or 625/576 (141.345 cents)

raised or lowered to natural tone

raised by 81/80, or one syntonic comma (21.506 cents)

lowered by 81/80, or one syntonic comma (21.506 cents)

raised by 25/24 plus 81/80, or 135/128 (92.179 cents)

lowered by 25/24 minus 81/80, or 135/128 (92.179 cents)

raised by 25/24 plus 81/80 plus 81/80, or 2187/2048 (113.685 cents)

lowered by 25/24 minus 81/80 minus 81/80, or 2187/2048 (113.685 cents)

lowered by 36/35, or one septimal comma (48.770 cents)

raised by 36/35, or one septimal comma (48.770 cents)

lowered by 36/35 plus 81/80, or 729/700 (70.277 cents)

raised by 36/35 minus 81/80, or 729/700 (70.277 cents)

lowered by 25/24 minus 36/35, or 15/14 (119.443 cents)

 raised by 25/24 plus 36/35, or 15/14 (119.443 cents)

 lowered by 25/24 minus 36/35 plus 81/80, or 243/224 (140.949 cents)

 raised by 25/24 plus 36/35 minus 81/80, or 243/224 (140.949 cents)

 raised by 33/32, or the 33rd harmonic (53.273 cents)

 lowered by 33/32, or the 33rd harmonic (53.273 cents)

 raised by 33/32 minus 81/80, or 55/54 (31.767 cents)

 lowered by 33/32 plus 81/80, or 55/54 (31.767 cents)

 lowered by 25/24 plus 33/32, or 100/99 (17.399 cents)

 raised by 25/24 plus 33/32, or 100/99 (17.399 cents)

 lowered by 25/24 plus 33/32 minus 81/80, or 45/44 (38.906 cents)

Hommage à Lou Harrison (1917-2003)

La Homa Kanto

for Harmonically Tuned Synthesizer Quartet

Andrián Pertout, No. 393
2005

This whole round living world – the Human Music – rouses &
– delights me, it stirs me to a "trans-ethnic", a planetary music.
Lou Harrison's Music Primer, 1971
